

NGRERP means information, insight, action and growth

NGR

Helping Businesses **Grow**

NGRERP means information, insight, action and growth

Your traditional financial management system (FMS) locks you in to rules, structures, and business models that can't evolve to meet your changing needs. But you need to redefine your systems on the fly, and respond to changing requirements anytime and anywhere. While you may be able to keep up with change, your traditional FMS can't. It's time you got a modern financial solution that is powerful enough to meet your needs today, but innovative and flexible enough to adapt as your business evolves and grows. Accessible on any device and deployed in the cloud - that solution is NGR's **NGRERP**.

Turn information into insight

It seems like far too often, you can't access the information you need at the time you need it—either because you haven't captured the right information, or because you can't easily retrieve it. But you can take control with the unified ledger in NGRERP, which gives you fast, easy access to smart transactions that deliver not just data, but detailed information with context that you define.

Integrate information

Imagine having all your ledger data combined in one place, whether it's from your general ledger, sales and purchase ledger, or even a user-defined ledger—without having to wait for batch updates or reconciliations. You'll be able to close your books faster—resulting in lower costs and greater efficiency—with a unified ledger.

Improve corporate performance

Streamline reporting and planning cycles with a single, integrated environment. Plus, make it easy for users and stakeholders to understand how your business is performing with immediate reporting and analysis.

Decision-makers will get immediate access to the integrated finance and operational information they need to better manage their business.

Increase information accuracy

Capture all the detail you need in the source system, and get a clear, complete view of your business from the very start. Finally, you can use spreadsheets as they were actually intended—to analyze the data in your system, not as an alternative place to store it.

Because your financial information comes straight from the source, you can be confident it's accurate and up to date. Not only will you be able to realign analysis and reporting to meet your evolving business needs, but you'll immediately see and report on any change you make - with smart transactions that capture the detailed data you need in order to change without changing.

Because you'll never again be locked into a static structure, you'll be able to:

- Quickly incorporate new product lines, organizational changes, and acquisitions.
- Ensure measurements and key performance indicators (KPIs) match the state of your business today.
- Protect your investment for the future and limit reliance on IT for business-level needs.

Turn insight into action

When you can see the impact of all your financial transactions as well as the trends that may affect your business tomorrow, you'll have a potent strategic advantage that benefits every aspect of your organization.

Make better decisions with:

Financial management. Get immediate access to all finance and accounting information so you can make fast and effective decisions about all aspects of financial management, including nominal ledgers, payable and receivable ledgers, consolidation, corporate

allocations, multiple currencies, dual-base currencies, fixed assets, and debtor management. You'll be able to meet multiple and evolving accounting and reporting requirements, because our solutions are highly flexible. Rest assured you'll comply with local requirements, multiple GAAP standards, and evolving reporting requirements such as IFRS.

Performance management. Simplify your budgeting, forecasting, and other financial planning processes with NGRERP budgeting and planning solutions. Turn your data into meaningful information, and then deliver it to the right people, in the right format, at the right time.

You'll be able to streamline consolidation, reporting, and analysis of data from third-party organizations and legacy applications, and gain insight into every aspect of your business that matters to you. Plus, you'll be able to deliver financial and operational KPIs to managers at every level, helping them make better decisions, faster.

Purchase management. Get a tighter grip on your purchasing activities with NGRERP complete web-based spending control and management solution, which you can deploy to large numbers of employees. Not only can your employees manage their own purchasing requirements, you can define rules and workflows that automate and enforce corporate policies, improving efficiency and saving money.

Order management. Take control of your sales, purchasing, and inventory management, and integrate your operations with your partners and customers. You can configure order processes and sequence your transactions the way you want to, access any associated documents you need, and automatically update your ledger and inventory in real time.

Professional services automation. You'll be able to handle project accounting, resource management, billing, and web-based time and expense management. That means you'll improve staff utilization, optimize cash flow, and increase revenue.

Document management. With just a few clicks of your

mouse, you can automatically capture, authorize, and archive business documents such as invoices, purchase orders, and statements. You'll save time, money, and storage space, and comply with increasing regulations—all while supporting your company's green initiatives.

NGRERP:

- Has 20+ years of financial experience built in
- Mirrors how you do business
- Provides one consistent data set
- Offers powerful reporting tools
- Delivers fast ROI

Work the way you live.

With NGRERP, you'll see a marriage between modern technologies and traditional applications, so you get the best of both worlds. You no longer have to sacrifice usability and convenience for the sake of functionality.

Social business. Take collaboration to new heights with social business technologies from NGR. You can create a centralized space for communications, making information that previously got lost shared, accessible, and auditable.

User experience. Form meets function at last with NGR's user experience platform. You can get a consumer inspired user experience in a business environment with applications that are as easy to use, attractive, and inspiring as personal technology.

Cloud. Get unparalleled flexibility with cloud deployment options from NGR. You have absolute choice in the way you deploy your data, making your information both portable and secure.

Turn action into growth

Whether growth means new markets, acquisitions, or products, you need to adapt and respond to unique requirements with ease - and speed. Standardize financial management and adjust accounting structures quickly, easily, and without breaking the bank.

You will:

Get built-in international expertise. If growth means going global, it's not enough to cover basic requirements like multiple languages and currency. You'll be ready to handle all the global essentials with NGRERP, which has advanced features such as four-dimensional multi-currency and parallel accounting treatments.

Leverage one solution for all your needs. Simplify system management, streamline processes, and make your business less complex with one solution that brings everything together across different sites, countries, business units, companies, and corporate offices—and is flexible enough to handle their varying requirements.

Provide a consistent and auditable environment. Comply with local statutory, audit, international financial reporting standards (IFRS), and other regulatory requirements with built-in audit trails, alerts, and sophisticated data reconciliation. You'll be able to handle simultaneous financial reporting requirements in multiple countries so you can close your books faster.

Growth through NGRERP

Meet change with confidence with NGRERP, which is designed to support and reinforce today's best financial management practices and address your key challenges. You'll be able to adapt to change without changing, get the information you need when you need it, and grow in any market. Plus, you'll be able to make the right decisions, at the right time, every time. You can implement NGRERP quickly and easily, leading to fast ROI and low total cost of ownership over the long run.

In addition, you can reconfigure the solution quickly to support changes in your financial processes and business operations.

You'll get everything you need to:

- Easily accommodate change.
- Manage the expected and unexpected.
- Protect your investment.
- Concentrate on your business without worrying about your systems.
- Simplify support worldwide.

Plus, because your system supports future growth, you can:

- Expand internationally without having to add new systems.
- Get up and running quickly in a new country.
- Standardize financial management across countries.
- Comply with multiple regulatory and reporting requirements.

About NGR

NGR Technosys is a global supplier of business management and revenue performance management solutions. At NGR, we live and breath business every day.
